

# Human FGFR2 beta (IIIb) Protein

Cat. No. FGR-HM1BB

## Description

<b>Source</b>	Recombinant Human FGFR2 beta (IIIb) Protein is expressed from HEK293 with His tag at the C-Terminus. It contains Arg152-Glu378.
<b>Accession</b>	P21802-3
<b>Molecular Weight</b>	The protein has a predicted MW of 26.5 kDa. Due to glycosylation, the protein migrates to 45-60 kDa based on Bis-Tris PAGE result.
<b>Endotoxin</b>	Less than 1EU per µg by the LAL method.
<b>Purity</b>	> 95% as determined by Bis-Tris PAGE > 95% as determined by HPLC

## Formulation and Storage

<b>Formulation</b>	Lyophilized from 0.22µm filtered solution in PBS (pH 7.4). Normally 8% trehalose is added as protectant before lyophilization.
<b>Reconstitution</b>	Centrifuge the tube before opening. Reconstituting to a concentration more than 100 µg/ml is recommended. Dissolve the lyophilized protein in distilled water.
<b>Storage</b>	-20 to -80°C for 24 months as supplied from date of receipt. -80°C for 3-6 months after reconstitution. 2-8°C for 2-7 days after reconstitution. Recommend to aliquot the protein into smaller quantities for optimal storage. Please minimize freeze-thaw cycles.

## Background

Four distinct genes encoding closely related FGF receptors, FGF R1 - 4, are known. All four genes for FGF Rs encode proteins with an N-terminal signal peptide, three immunoglobulin (Ig)-like domains, an acid-box region containing a run of acidic residues between the IgI and IgII domains, a transmembrane domain and the split tyrosine-kinase domain. Multiple forms of FGF R1 - 3 are generated by alternative splicing of the mRNAs. A frequent splicing event involving FGF R1 and 2 results in receptors containing all three Ig domains, referred to as the alpha isoform, or only IgII and IgIII, referred to as the beta isoform.

## Assay Data

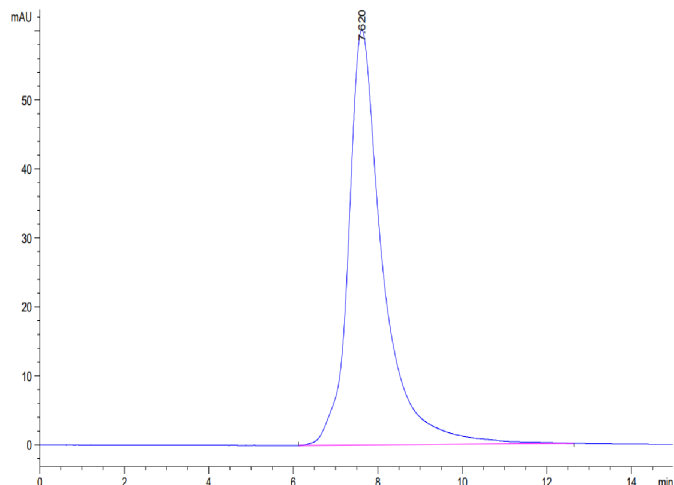

### Bis-Tris PAGE

Human FGFR2 beta (IIIb) on Bis-Tris PAGE under reduced conditions. The purity is greater than 95%.

### SEC-HPLC

Assay Data

The purity of Human FGFR2 beta (IIIb) is greater than 95% as determined by SEC-HPLC.

ELISA Data

**Human FGFR2 beta (IIIb), His Tag ELISA**

0.1µg Human FGFR2 beta (IIIb), His Tag Per Well

Immobilized Human FGFR2 beta (IIIb), His Tag at 1µg/ml (100µl/Well) on the plate. Dose response curve for Anti-FGFR2 Antibody, hFc Tag with the EC50 of 5.2ng/ml determined by ELISA (QC Test).

Blocking Data

**Inhibition of Human FGFR2 beta (IIIb) and FGF10 Binding**

0.2µg Human FGFR2 beta (IIIb), His Tag Per Well

Serial dilutions of Anti-FGFR2 Antibody were added into Human FGFR2 beta (IIIb), His Tag : Biotinylated Human FGF10, No Tag binding reactions. The half maximal inhibitory concentration (IC50) is 1.74ng/ml.
